Learning Outcomes

- identify and name the sources of light.
- -identify and name sources of light that we can see.
- -explain what darkness is.
- -compare sources of light. (brightest, dullest, darker, lighter)
- -observe and describe shadows during the day.

Knowledge

In many parts of the world, the year is made up of four different seasons. These are spring, summer, autumn and winter. Each has its own pattern of weather and varying hours of sunlight.

September, October and November are autumn months. In autumn it is normally wet and windy. Sometimes there are storms. In autumn it is often wet and windy. It is still sunny sometimes, but the temperature is cooler than summer. You need to wear warm, waterproof clothing, like a coat, a jumper and trousers. Sometimes you might need a scarf and an umbrella.

December, January and February are winter months. In winter it is normally cold and wet. Occasionally it snows but most of the time it is cloudy. In winter it is cold most of the time. Sometimes it rains but on cold days it might snow. It is often frosty in the morning.

In the winter you need to have warm clothing, like a hat, coat, scarf and gloves. When it is very cold you might need winter boots.

Animals adapt in lots of ways, some eat different foods and some

Autumn

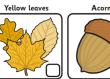

Shefali Oza (born 24 September 1967) is an Indian TV personality and the main weather presenter on BBC Birmingham's Midlands Today.

FUN FACTS: In places like

Arizona and Texas, the seasons don't change much. Some plants stay green all year round and it doesn't usually snow.
