

Key Vocabulary

Word	Meaning
Habitat	environment in which a plant or animal lives
urban	belonging to a city
woodland	and that is covered with trees, shrubs, or bushes
coastal	Near the seaside
dead/ non-living	No longer living
reproduction	Producing offspring or new individuals
respiration	breathing
excretion	waste matter that has been discharged from an animal or a plant
food chain	each of which feeds on the one below
omnivore	an animal that will feed on any type of food
carnivore	an animal that only eats other animals
herbivore	an animal that feeds only or mainly on grass and other plants.

FUN FACTS: There are 21000 different kinds of insect in the British Isles, and 598 kinds of birds.
Forest habitats cover 1/3 of all the land on Earth.

Learning Outcomes

- Explore and compare the differences between things that are living, dead, and things that have never been alive
- Identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other
- Identify and name a variety of plants and animals in their habitats

Habitats

Knowledge

There are certain things that all animals (including humans) need to be able to do in order to be alive:

- Movement
- Respiration
- Sensitivity
- Growth
- Reproduction
- Excretion
- Nutrition

Dr. Jane Goodall
3 April 1934
 She's a **primatologist** whose ground breaking **chimpanzee studies** in **Tanzania, East Africa**, changed the way we think about wildlife forever!
